

Town Council Make Plans For Diagonal Parking On One-Way Street

At a regular meeting of the Didsbury Town Council held Monday night, it was decided to try a new method of parking on the avenue which covers the area from the Royal Bank to the Telephone Office. Reports have it that it will be a one-way street. Cars may enter from the east and park diagonally on either side; traffic will not be allowed to approach from the west entrance to this street.

The necessary warning signs are expected to be in place within the next two weeks, until then it is presumed the "main stem" will be open to traffic both ways. This is what they call a try-out season and a final approach to the parking problem in this area will not be made for some weeks.

At this meeting of council building permits were granted to Mr. G. Bryan for a residence, and to the B.A. Oil Company for a bulk oil station.

As to roads, the town fathers agreed that the road from Jenkins Groceries to Rosebud Motors be excavated and gravelled, as were other portions of the business section of the town.

LIGHT YOUR WAY . . .

... WITH BIBLE STUDY

This is a personal question. Do you realize how difficult, nay, impossible, it is to keep God's law? The mere wicked deed, even if it does not develop into a deed, is sin. Let me quote a few examples.

King Ahab wished to have Naboth's vineyard. That wish led to sin. Naboth refused to part with his possession, for it was an inheritance. But the covetous desire in Ahab's heart led to the murder of Naboth and then to stealing his property.

And another example. It was not wrong for King David to wish to have a wife. That is only natural, and many today have the same desire. But when David wished to have the wife that belonged to another man, Uriah, that was wrong. This covetousness led to adultery. And to cover this, it led to murder.

Covetousness is lust. It means "wish to have." It goes further. It means to have that which already belongs to someone else. And the green-eyed dragon of lust says: "If I can't get it by fair means, I will stoop to foul."

You and I, without exception, must face this dragon daily in our lives. Thus God said to us: "Thou shalt not covet thy neighbor's house. Thou shalt not covet thy neighbor's wife, nor his man servant, nor his maid servant, nor his cattle, nor anything that is thy neighbor's."

Our own heart convinces us that we have often given way to lust, that is sin. For that reason we need a Savior. That is Jesus Christ. He came to take our sins upon Himself that we might have Life.

Is This A Bug's World ???

Somewhere once figured out that there are as many insects in one square mile of land as there are people in the whole world. This works out to about 50 million insects to every human being, so people can consider themselves lucky that most insects are rather small. Small or not, though, they have, collectively, giant-sized appetites. Insects destroy one-third of all the food man grows, and this figure would be much higher were it not for agricultural chemicals.

Adequate chemical control of these food destroyers has enabled man to grow not only more food but better quality food, and continued research in agricultural chemicals will increase food production while decreasing destruction.

EARLY EDITION THIS WEEK

In order to keep even with the majority of business places in town we had to run our machines a bit faster this week. The majority of those usually affected by this type of day off, fell in line when the mayor proclaimed a civic holiday for Wednesday (at the time of writing The Pioneer is trying to follow the same course).

Because of this, it's the date of the annual Didsbury Jamboree. No doubt some of our correspondents will arrive too late for this publication but we'll catch up to you next week. After all news that you haven't read is still news — that's the way a lot of people look at it, including Tim.

Westcott News

(From Our Own Correspondent)

Mrs. Herbert Goetsch returned home at the weekend from Calgary where she had gone for further X-rays on the advice of her doctor. Mrs. H. Papke of Calgary, mother of Mrs. H. Goetsch, home while her daughter was hospitalized. On Sunday Mr. and Mrs. Lyle Johnson and family of Veteran, arrived here and will spend part of annual holiday with the latter's parents.

Friends of Mr. Wilbert Berscht, a former district resident, will be pleased to hear he is regaining his health in the General Hospital, Calgary, but it is expected he will have to remain there for some time yet.

Haying has been going on at a great clip in this area and it looks as though when that is completed the swathing season will be on as crops have been ripening fast during the recent hot spell.

We note Mrs. Baudiste Sr.'s little house received a new coat of paint while her son Adolph of Calgary and his family were visiting her.

Daily	8:02 p.m. (Flag Only)

Mr. E. W. Miller of Sundre proudly displays his great grandson, Kevin James Wilson, while the boy's mother, Mrs. C. E. Bever-

Moira Johnson, left, the 15-year-old girl from Baie d'Urfee, Que., who had a kidney transplanted from her identical twin, Nola, right, looks fit and well as she prepares to leave the hospital where the operation was performed on May 14. She plans to return to school in September.

Young Golfers Win Trophies

The junior section of the Didsbury Golf Club (male edition), held its first tournament on Sunday, August 3rd. Ten members entered the two-flight competition.

Doug Allen came in with a fine 47 to take the 14 years and under class and Bruce Yunkers won the 18 and under class with a 58.

Lowest net score was captured by D. Moon; second low net, Andrew Miller.

The senior committee were exceptionally pleased with the turnout and hope next year to organize a proper junior section which will be affiliated with the senior group. Dr. R. Bankier donated the cup for the 14-year-old class and Mr. J. Miller for the 18-14 group. All other participants received a consolation prize.

Winners last Thursday in the weekly ladies' competition (low score, no winter rules), were Mrs. Reeta Gilbric, Mrs. Ann Jenkins and Mrs. Jean Shields.

This week's competition will be a two-ball foursome.

TODAY'S CHUCKLE

John: "Mary, who was that man I saw you kissing last night?"
Mary: "What time was it?"

GRAVEL GERTIE FEELING BETTER

A late report from Salem, Ore., states that Connie Holland, a ten-year-old rock eater, has fully recovered after swallowing an estimated 200 pebbles.

Her mother, Mrs. Patrick Holland, said a touch of pneumonia, treatment of which took a week ago to discovery of the rocks inside Connie, also has cleared up.

Connie, who says she now is called Gravel Gertie, swallowed the rocks during the last six months because they "tasted real good."

Doctors removed some of the pebbles and let nature take care of the rest. They attributed the incident to a possible mineral deficiency in Connie's system.

Have You Heard ? ?

One of my favorite friends was caught in the dog-catcher's net the other day. They tell me more than one dog is in the pound because they weren't obeying traffic laws. One rumor has it that a recent visitor to the pound is facing a charge of creating \$20 worth of damage. Sure hope he can raise the necessary checkbooks of found utility; sure hope he knows enough to say in bounds next time he's out on his own.

Noticed a heavy rain, followed by a high wind and small hailstones when I was crawling around last Sunday evening. Didn't seem to be much damage heretofore. By the way, I like to watch lightning but not when my favorite TV program is on; the screen in our house just goes seat, seat, seat at me. What do I do? I seat and watch the lightning; it's better than watching some of the phony CBC programs they've been throwing at us on the music screen.

To Mr. and Mrs. M. Russell of Didsbury, on August 1st, a daughter.

Baseball Team Reaching . . .

At press time Didsbury's entry in the Chinook Baseball League were struggling with Hainstock to find a place in the four-team playoff. These teams were scheduled to meet Wednesday; the Didsbury Jamboree as they were tied for fourth place. If the game went off the four teams in the playoffs for the league title will have been decided.

Initials ended in top spot in the league, followed by Crossfield and Carstairs. In the league playoffs the 1st and 4th teams tangle, and the 2nd and 3rd.

ALL HE WANTED WAS HIS PANTS

Vancouver — A burglar, who presumably forgot to pick up his pants from the dry cleaners before closing time Saturday, found them later when he broke into the building. The map left a note saying he had broken in to get the pants, and was leaving for Toronto. The \$3.50 bill went unpaid.

The burglar took nothing but his trousers.

BERGEN NOTES

(From Our Own Correspondent)

The Ladies' Aid held its regular meeting was held at the home of Mrs. Fred Thomassen on July 31.

Following a short business session, Mrs. Nelson, missionary on furlough and the wife of the present pastor at the United Missionary Church, gave an interesting talk on their work in Nigeria.

Mrs. Thomassen then served a lovely lunch, assisted by her daughter Mildred, who is home on a month's leave from the Calgary General Hospital, where she is a nurse.

Mr. and Mrs. Percy Blain spent last weekend in Banff.

Mr. John Haug is at present a patient in the Didsbury hospital.

Haying is in full swing with many more bakers in evidence than is usual in this district.

Mrs. Solveig Clarke, Jean and Carol, have returned home after attending a church conference at the west coast.

Doukhobors Want Help

Sons of Freedom Doukhobors Monday issued a declaration asking federal and British Columbia governments for specific assistance in their proposed migration to Russia. The radical Doukhobor sect said 3,000 of their number have decided to make the move.

The "interim declaration" issued by the Fraternal Council of the Union of Christian Communities and Brotherhood of Reformed Doukhobors contains four requests to the governments and four pledges by members.

Demands included transportation costs for the move, reimbursement for assets left in Canada, contribution towards cost of establishing a community in Russia, to be paid directly to the Russian government by the Canadian government.

LEGION AUXILIARY VISIT CALGARY

The Ladies' Auxiliary to the Canadian Legion, zone 2, district 5, were in Calgary Wednesday. While there they visited the Calgary Fish Hatchery, the Belcher Hospital (where they left treats for the patients), and the Jubilee Auditorium.

Included in the Didsbury party were Mrs. R. Gullie, Mrs. L. Wilkins, Mrs. I. McQuarrie, Mrs. N. Freeman, Mrs. M. Hipkin, Mrs. I. Nimmons, Mrs. Crawford and Mrs. E. Richardson.

VACATION BIBLE SCHOOL IN SESSION THIS WEEK

The annual Vacation Bible School of Redeemer Lutheran Church began on Monday and will continue throughout the week until Friday. The climax for the V.B.S., as well as a day for the entire congregation and their friends, will be the annual congregational picnic. This will be held on Sunday, August 10, at the Rugby hall.

The picnic will begin with the regular morning service in the hall at 11 a.m. A joint dinner will follow. The afternoon will be devoted to fellowship for the older members and sports for the younger folk.

The children attending V.B.S. will also display some of the handicraft items they completed and sing a number of songs immediately after the morning service. Redeemer Lutheran Church takes this opportunity to invite all its members and friends to worship with them.

Local Girl Wins Essay Contest

A record 56,603 pupils wrote essays on Fractor Safety in the eighth Farm Safety Essay Competition sponsored by the Alberta Safety Council. The contest was open to pupils of grades 5, 6, 7 and 8 in the rural schools and in the correspondence schools. The correspondence branch and 46 school divisions are represented in the above figures.

Final judging was completed recently in Edmonton from the essay received by the school superintendents. Prizes are awarded in each school division and the correspondence branch for the best essay from grades 5 and 6 and the best essay from grades 7 and 8. The pupil whose essay is judged the best in each grade group receives an attractive lapel pin and, as a permanent record, the schoolroom receives a hand-lettered certificate, mounted under plexi-class on a wooden plaque.

In addition to the school division prizes, first and second prizes of \$50 and \$25 are given to the pupils from grades 5 and 6, who, in the opinion of the judges, have written the best and next best essays for that group in the whole province, and the same for pupils from grades 7 and 8 at the province level.

In the Olds School Division, Pamela Brooks won the grade 5 to 6 group. Her winning essay will appear in these columns next week.

WANTS RULES STREAMLINED

Prime Minister Diefenbaker said Monday consideration will be given "at the next session" to ways of speeding parliamentary business, and implying the charges should be modified on the "Mother of Parliaments" at Westminster.

"We're all guilty, he said, appealing to parliamentarians to purge themselves of repetitious utterances masquerading as wisdom."

Kin Korner

The regular meeting of the Kinmen Club was held Monday evening. It was reported by those who had worked at the playground that the cement had been poured for the wading pool. Canadiana permitting it is hoped to have the pool ready for the young fry within the next couple of weeks. The pool is sloped to the centre where the water depth is expected to be about 18 inches. A drainage system will be in operation which will permit fresh water being added at any time.

IN MEMORIAM

In loving memory of Garnet S.
Tighe, who passed away August
8th, 1954.

Remembrance is a golden chain.
Death tries to break but all in
vain.

To have, to love, and then to
part,

Is the greatest sorrow of one's
heart.

The years may wipe out many
things.

But this they wipe out never:
The memory of those happy
days.

When we were all together,
— Lovingly remembered by his
wife, Ethel, and family. 1tc

"No business man in any town
should allow a newspaper pub-
lished in his town to go without
his name and business being
mentioned somewhere in its col-
umns. This does not mean you
should have a whole, half or even
a quarter page ad in each issue
of the paper, but your name and
business should be mentioned if
you do not use more than a 2 line
space. A stranger picking up a
newspaper should be able to tell
what business is represented in
town by looking at its paper —
it's the best possible town adver-
tiser. The man who does not ad-
vertise his business does an in-
justice to himself and the town.
The man who insists on sharing
the business that comes to town,
but refuses to advertise his own
in the newspaper is not a valuable
addition to any town. The life of
a town depends on the live wide-
awake and liberal advertising busi-
ness men."

If a man took up a position in the middle of Main Street, say, and began firing a machine gun down the length of the street, we'd be rather disturbed about it, would we not? We'd more than likely report it to the police, and the machine gunner would be arrested. Probably we'd send him to prison for a good long stretch. And we'd even take his weapon away from him, so he couldn't go on endangering life and property.

Even if he explained that he didn't really want to hurt anybody and that he was trying to shoot through gaps in the traffic, we'd still disapprove of his actions. And we'd take steps to make certain he didn't do it any more.

But when the weapon is a car and a man drives past us on the highway at 70 or 80 miles per hour, about the most we do is shake our heads and say: "Look at that crazy so-and-so. He's going to get hurt some day."

Or maybe with a touch of admiration: "Boy he's really stepping."

Or maybe we bear down on our accelerators just for fun, to see how our weapons perform in comparison with his.

And we go on killing, and nobody seems to care very much. Here and there, in a few isolated

communities, the people have sickened of the sport and of the sight and smell of blood, and they've put a stop to it — or at any rate drastically reduced the bag limits.

But the rest of us don't seem to mind. If we really disapprove of automotive murder, we'd stop it. Because it can be stopped. It might put us to a little inconvenience now and then, but that's about all it would cost us.

We can give you the recipe for it in case anybody should happen to be interested. It could stop the killing in five minutes. The recipe comes in two parts. Here they are:

One: Drive, always, so that you can stop within the assured clear distance ahead.

Two: Crack down on offenders as you would on the man with the machine gun.

Sure, sure, sure, we know all that, that's old stuff; tell us something new for a change, we're tired of that one, and besides, do you expect us to call a copper on somebody who's doing something that we've done ourselves a hundred times?

All right. That's what we've been saying. The killing goes on because we don't really want it stopped. We can't be bothered.

We're all in it. Some of us are

Here are the

FACTSabout exchanging your**3% wartime Victory Bonds****1. What is the Canada Conversion Loan of 1958?**

It is an offer to replace all unmatured 3% wartime Victory Bonds with new 25-year 4½% Canada Conversion Bonds. (Other bonds of shorter term, bearing interest rates of 4¼%, 3¾% and 3% are also available.)

2. Why is the Government making this conversion offer?

In order to reorganize the national debt on a longer term basis and thus reduce the volume of Government refinancing over the next few years. There is widespread public and business agreement that this is a sensible idea and will help protect the soundness of the Canadian dollar.

3. What interest will I receive on the new bonds?

On the 25-year bonds the interest rate is 4½%—this is 50% greater than the old Victory Bond rate. The increase on the 14-year and the 7-year bonds is also substantial.

4. As a Victory Bond holder, will I be required to make any additional payment?

No. On the contrary, you will receive an immediate cash adjustment.

5. Do I have to convert my Victory Bonds?

You may, if you wish, hold your Victory Bonds until maturity and on the due date you will be paid their full face value. The Conversion Loan offer is open only to Victory Bond holders; and the "right" to convert gives Victory Bonds a special value until the offer expires. This is because there are many people trying to buy them in order to invest in the new bonds.

6. What will be the total of my cash adjustment?

It will depend on the type of exchange. For example, a \$500 8th Victory Bond exchanged for a \$500 Conversion Bond paying 4½% will give you \$8.75 in cash immediately. This includes earned interest.

7. Does this offer apply to Canada Savings Bonds and other Government of Canada Bonds?

No. This offer is limited to unmatured wartime Victory Loan Bonds only.

8. What steps should I take if I am away from home on vacation and wish to take advantage of this offer?

You should write immediately to your bank, investment dealer, stockbroker, trust or loan company, requesting literature and application forms.

9. Does it matter that the Victory Bond I hold is very small?

Every holder of a Victory Bond, even though the amount held may be only \$50, should take advantage of this offer. It is in his best interests as well as in the best interests of Canada.

10. How long is this offer open?

Until September 15, 1958, but it is to your advantage to convert as quickly as possible and have the benefit of the immediate cash adjustment.

11. Where can I exchange my Victory Bonds?

At any bank, investment dealer, trust or loan company, or through your stockbroker.

and

Roamin'

Took A Little Time, But...

The weatherman was not on the side of the tractor who was picked to lay the hard top on the main stems (notice the plural please); the stems now travel in two directions. Still with the road scene (one of our favorite subjects), when, now, does work start on the residential sections of our fair metropolis? When does the road to the cemetery receive a bit of attention? When people make the last trip they don't want to be halted by an impassable road, as some have been in the past.

So Far, So Good...

Seems from this corner that a number of district farmers are getting a "free ride" on the hail suppression merry-go-round. Two aircraft and a number of generators are working within the boundaries of the Municipal District of Mountain View, spouting whatever they spout, towards the hail clouds. These manoeuvres, we think (we do think at times), must give a coverage of a large portion of the M.D. Whether or not these operations will make a difference in hail damage hereabouts is not for us to decide. At the time of writing there have been very few of the white pellets seen in this area — this scene could change anytime; we're certainly hoping it doesn't!

Just For The Record...

We've got no beef with people who own and like dogs — sometimes we like dogs better than people. For those of you who want to keep your canine friend in the family circle we would suggest that you get a tag for him (or her); make sure he (or she) do not keep the neighbor's garden or new lawn unhappy. The law can move in, legally as usual, and make a lot of people unhappy — but that's the rules, let's try our best to stick by them.

Another Famous Quote...

"The next best thing to a really good woman is a really good-natured one." (So true).

Guesting Again...

FALSE FRONT FOR CENTRALIZED AUTHORITY

For many years now we have wondered why our system maintained school boards. Their duties and responsibilities are so hedged about rules and regulations that the average school board has as little as a false front for the Department of Education. The local board can take the blame that would necessarily confront the Department officials, and for that reason it is wise to have a group of men to take up the slack right on the ground. When it comes to a matter of policy the school board has very little authority. We recall a case here in the Camrose School Division where the court over-ruled the school board, but the victor had little joy in his victory. Now there is a case down in Okotoks where the principle of discipline is involved, and the principal of the school is challenging the school board's authority to terminate his contract. We hold for security of tenure on the part of the teacher, but we also hold that a school board should have some authority in dealing with delinquency of tenure without the case being dragged through a public court hearing. Our troubles in Alberta are no different than those in the United States. We recall reading an article in The Saturday Evening Post where a woman retired from the teaching profession when the authorities withdrew her right to enforce discipline in her classes. Her crowning experience was when a thirteen year old student whom she was reprimanding for misconduct up and kicked her in the shins before the entire class. Bound by the rules of the school, she was unable to enforce any discipline upon this boy herself. She had to report the case to the principal, who had so many other things on his mind that he was not interested in her troubles. Nor did the parents co-operate in the keeping of discipline within the classrooms. They seemed to think it was very smart for their own brats to humiliate the teachers who should have been given the authority to maintain discipline. After reading some of the Okotoks evidence as it appears in the daily papers we would say that a copy of the so-called popular novel, Peoria Place, had found its way into the classroom and had been widely read.

— Camrose Canadian

PAYING TWICE

When the Conservative government's refinancing scheme was first announced it was greeted enthusiastically by Canadian financial houses. A fine move, they all said practically in unison. Canadian taxpayers are finding out bit by bit just how fine a move it was — for the financial houses if no one else. Finance Minister Fleming has now announced the commission rate that will be paid for handling the conversion bond issue. First there is a flat quarter of one per cent issuing fee, a matter of \$15 million on the \$6.4 billion deal. Then there are commissions that will be paid ranging from a quarter to one per cent on all bonds not on the "restricted" list. How much this will amount to is impossible to tell at the present time — it will depend largely on how many bond holders choose to convert to the 25 year, 4½ per cent bonds on which the highest commission is paid. But without doubt the total will reach many millions of dollars.

This is all "money for jam" for the financial houses. Mr. Fleming emphasizes that the commissions average substantially less than was paid on savings bonds of 1955, 1956, and 1957. But does Mr. Fleming expect the public to overlook the fact that the government is paying commissions twice on the same money? No wonder there was enthusiasm in some financial circles. It is not often that a government pays two commissions to raise one some of money.

— The Calgary Albertan

CHRISTIAN SCIENCE

The true nature of God as infinite Spirit will be set forth at Christian Science services this Sunday.

Keynoting the Lesson-Sermon entitled "Spirit" is the Golden Text from Zechariah: "Not by might, nor by power, but by my spirit, saith the Lord of hosts" (4:6).

Selections from "Science and Health with Key to the Scriptures" by Mary Baker Eddy will include the following (200:4) "Moses advanced a grand human capacities of being bestowed by immortal Mind."

The vital importance of understanding God is also emphasized in Bible passages to be read, including this one (John 4:24): "God is a Spirit; and they that worship him must worship him in spirit and in truth."

"Husbands, please note: If at first you don't succeed, try a little ardor!"

LOCAL I.H. REPRESENTATIVE LEAVES FOR CHICAGO

Stan L. Janzen left by plane Sunday, August 3rd, for Chicago where he will be the guest of International Harvester. He will spend August 4th and 5th out at the company's experimental farm at Hinsdale, Illinois.

"During my two day stay at Hinsdale," said Stan, "I will have the opportunity of seeing and operating Harvester's brand new lines of tractors and farm equipment."

"According to advance information I have received from the IH District Office at Calgary this preview and demonstration will feature the many new tractors and implements that have been developed by IH engineers to improve and speed up farm operations."

International Harvester has made elaborate plans to make my Chicago visit a most informative one where product facts will be presented on the new line of tractors and equipment, many of which will be on display in our store very soon."

Homemakers

By HELEN HOWARD
District Home Economist

HELLO FRIENDS —

CANNING CLUES
Are one of these canning pro-
blems a problem of yours?
Floating Fruit

Conditions
Fruit is at top in a mass. Some-
times is all broken, probably both
overcooked and too ripe. Sometimes
the fruit is in good pieces but still
floating. It's safe to use, but of-
ten not attractive.

Prevention
1. Use lighter syrup and just
ripe fruit
2. Allow sugar to stand on fruit
before canning. (Strawberries
particularly)
3. Precook firm fruits.

Faded Food
Condition
Sometimes a poor preparation
makes food lose color. Some varie-
ties lose color more than others.
Some fade when stored in a light
place. Safe but not attractive.

Prevention
1. Prevent injury to berries, caus-
ing escape of juice.
2. Store in a cool and dark place.
Despite the fact that freezing has
become ever prevalent in the last
few years, there are still many
fruits and vegetables like pears and
carrots that seem to preserve more
satisfactorily with canning than
freezing.

There are two main requirements
for successful canning. The first is
to allow sufficient processing time
to destroy all spoilage organisms
such as yeasts, molds and bacteria.
The second is to use air-tight con-
tainers so that no spoilage organ-
isms can find their way into con-
tainers after the processing is com-
plete.

Before beginning to can, even
buring and gathering any fruits
or vegetables, it is important to
read instructions and refresh your
memories: Our bulletin "Home
Canning of Fruits & Vegetables" is
available from this office.

CANADIAN DOCTORS PIONEER

"FROZEN SLEEP" SURGERY

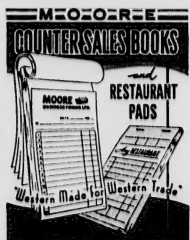

Pioneer "Frozen Sleep" surgery
by researchers, under Dr. Wilfred
Gordon Bilezikian at University of
Toronto, has led to the performing
of hitherto impossible operations,
reports J.D. Ratcliffe in August
Liberty Magazine.

Experimenting with hibernating
ground hogs, Dr. Bilezikian dis-
covered it was possible, by reducing
body temperature to 68 degrees, to
cut off blood supply to heart and
brain for 10 to 15 minutes without
harm. Since then, more than 1,000
delicate operations have been pre-
formed with the aid of "hypo-
thermia", as the new cooling pro-
cess is called.

In October 1955, Kenneth Ross,
a 23 year-old athlete from Durham,
Ontario, underwent three "deep-
freeze" operations in a row at Tor-
onto General Hospital — one on the
main artery, near his heart, then
two delicate brain operations a
week later. Mrs. Sleem, a 43 year-
old Vancouver housewife who un-
derwent "deep-freeze" for a rheu-
matic heart, said of the cooling
process, "I didn't shiver at all. I
seemed to be lulled to sleep." One
28 year-old woman, weakened and
wasted by a hole in her heart, was
put to sleep and cooled to 72 de-
grees while the hole was repaired.
Two months later, she was doing
housework.

When the body is cooled below
90 degrees, the cold itself acts as
a pain killer and sleep producer,
so that often, no further anesthe-
tic is necessary. And, since vir-
tually all anesthetics are poisonous,
hypothermia has the added advan-
tage of hastening recovery from
difficult operations, reports Rat-
cliffe.

"Hypothermia is proving excep-

THE DIDSBURY PIONEER

Notes From D.A.

By Murray Wilde

During the past few years a large
number of Scholarships and burs-
aries have not been applied for by
very many, people, says C.L. Usher,
Supervisor of 4H Clubs. This is an
opportunity that should not be
overlooked by farm young people
since the cost price squeeze has re-
duced the cash available to farm
families.

According to Canadian Council on
4H Clubs; governments - federal,
provincial and municipal, private
organizations, business firms and
individuals are continually enlarg-
ing student aid programs. The aim
being that no young Canadians
with ability to profit from higher
education will be denied the oppor-
tunity because of financial reasons.
Canada needs more highly educated
citizens.

Through the above mentioned a-
gencies, Scholarships are open to
students of both high and average
academic standings.

Bursaries are available at most
Canadian educational institutions to
needy, deserving students with an
acceptable academic record.

Prizes are available that provide
financial assistance. The basis of
award includes general proficiency,
special achievements, leadership or
other distinguished activity.

Loan funds are available at most
universities and colleges from which
student in financial need are able
to borrow money to continue their
education. Most loan funds are
interest-free while the student re-
mains at the institution and usually
for at least one year after gradua-
tion; thereafter, the loan would
be repayable over a period of years.
The interest rate on student loan
funds, if any, is low.

More complete information on
these scholarships, bursaries, prizes
and loan funds can be obtained
from the registrar or secretary of
the university, college or school of
the student's choice.

If you plan on entering univer-
sity or college, do not overlook the
diverse and successful careers that
are available to graduate students
of Agriculture. Hundreds of trained
people are needed in this field.
Even if you intend to farm, a uni-
versity training will give you a
greater chance of success in the
future; considering the continual
revolution in farming methods.

GEMS OF THOUGHT

MARRIAGE —

A happy marriage is a long con-
versation that seems all too short.
— Audre Maurois

The happiest wife is not the one
who marries the best man, but the
one who makes the best of the
man she marries.
— Joseph Fort Newton

Marriage! Nothing else de-
mands so much from a man!

The happiness of married life de-
pends upon making small sacri-
fices with readiness and cheerfulness.
— John Selden

tionally useful in brain surgery,"
Ratcliffe says. "With the patient
cooled to the low 80's, the blood
supply can be cut off for up to 20
minutes. That gives surgeons time
to work with new, unhurried con-
fidence."

While 86 degrees is considered
today's safe temperature, far below
ones may be achieved soon. Dr.
Bilezikian: "It is quite possible that,
within the next few years, prolonged
interruption of the circulation at
very low temperatures will be
achieved." When this happens
prolonged operations - out of
reach to-day - may become as com-
mon as tonsillectomies

SERVICE BOARD NOTES
— By —
W. K. SNYDER
Agricultural Service Board

TAKE ANOTHER LOOK at your fields to see if you have any perennial sow thistle. The past week many new patches and clumps of this conspicuous weed are showing up in new places all over the district. People who didn't know they had sow thistle now are finding them in grain fields and around sloughs, etc. Now is the time to deal with them.

The best way that I know to kill the patches is with a heavy dose of 2-4-D. Over the past three years we have on several occasions sprayed whole fields that were in full head just about this time of year. In every case on record the sow thistles were almost, if not completely destroyed with that one treatment of 2-4-D at 7 or 8 ounces of ordinary acid per acre.

It is true that wheat damage will result of having sprayed the crop

FAMOUS QUOTES . . .

If things ever get back to normal, we'll probably wonder what's wrong.

The woman who insists upon making a match for her daughter probably intends to referee as well.

If taxes aren't cut pretty soon, people may be forced to marry for love.

at this time of year but the benefit that results from this action far outweighs the damage done. Small patches should be sprayed by hand with a knapsack sprayer. Mix one pint of 2-4-D with three gallons of water and spray the plants. This is far more effective than cutting or pulling them.

BEST WEEDWORM: This striped, olive green worm has been attacking gardens lately. Normally they feed on lambsquarters, thistle, fennel, sugar beets, etc. When food becomes scarce they move in on the gardens.

In the field crops they can be killed with the insecticide Endrin at 4 ounces actual ingredient per acre. However, on garden things it isn't safe to use anything but derris dust or pyrethrum dust. These materials are not poisonous to human kind.

GAS

GROWING WITH ALBERTA

. . . by helping Alberta grow!

In case you've been too busy in notice, Alberta has been "bustling" out all over in the last few years. Its growth is reflected in these gas company figures for 1947 to 1957.

During these ten years the number of customers served by Canadian Western has more than doubled - 34,500 to more than 75,000!

And the amount of gas used in Southern Alberta has risen from just over 18 billion cubic feet a year to more than 37 billion cubic feet - again a jump of more than 100 per cent.

Much of this increase is due to the fact that thirty-five towns, villages and hamlets have been added since 1947 to the number of communities enjoying natural gas service.

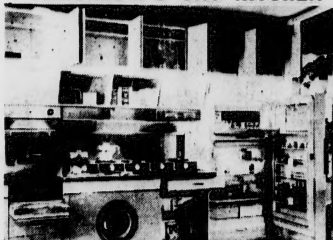

The future? All the signs suggest that the demand for natural gas on Canadian Western's system will double again in the next 15 years. Our busy, booming province hasn't stopped growing yet.

KEEP THAT PILOT LIGHT BURNING

Almost everyone has shivered through the misery of an unheated home during a sudden summer cold spell. While you wait for your cold furnace to warm up you lug the fireplace or shusher in front of an open oven door!

Be prepared! Keep the pilot light burning all summer. Then your furnace can be turned up to full efficiency in minutes. The cost is just pennies a year. Yet the tiny flame spurs your furnace to instant heat at the first sign of a change from summer weather. It also protects your furnace against damp and keeps your whole basement dry.

THE SHAPE OF THINGS TO COME TOMORROW'S GAS KITCHEN

To give you a preview of "the shape of things to come", here is a complete "gas appliance wall" developed by the gas industry to save steps and speed up housework. This dramatic "Multitask Wall" features foldaway cooking burners, wall oven-broiler, refrigerator, water heater, washer-dryer and warm air furnace - all in one colorful unit 8 feet high and 10 feet wide. What more is possible? The efficient, compact design of today's gas appliances! So, while the "Multitask" is still a "dream kitchen", modern housewives can achieve much the same results with the many fully automatic, space-saving gas appliances and heating units available now from gas appliance dealers.

Didsbury Visitors Now Ride On A New Hard Top Highway In Business Sections; Eastern Approaches Are Also Hard-Topped!

NOW GARBAGE GETS "DOUBLE BURNING"

The secret of smokeless and odorless incineration, available only with a gas incinerator, is "double burning".

In addition to the combustion chamber of the incinerator, there is a second chamber in which smoke and odorous fumes pass over a second flame and are destroyed.

To test the "after-burner" idea, hold a burning match directly over the lighted end of a cigarette and watch the smoke vanish.

Now, in your own basement or utility room, you can burn everything from cleaner sweepings to old shoes and soggy vegetable peelings. Nothing remains except a handful of clean ash, and you won't find a whisper of smoke or odor.

SUMMER FAIR DRINKS

in your own back yard!

by Evelyn Erdman, Home Service Director

PINK CHERRY SODA
1 envelope cherry flavored drink powder
1 cup sugar
2 cups milk
1 quart vanilla ice cream
1 quart carbonated water or gingerale
Combine drink powder and sugar. Dissolve in milk. Add scoops of ice cream and your carbonated beverage over it. Makes 2 quarts.

DOUBLE RASPBERRY MILK SHAKE
1 cup finely sieved fresh raspberries
1 cup sugar
1 pint vanilla ice cream
1 1/2 cups milk
Combine berries and sugar. Add mixture to one half the ice cream; heat until smooth. Add milk all at once and blend. Serve in chilled glasses. Top each with a scoop of ice cream. Serves 4.

PEPPERMINT STICK MILK SHAKE
1 quart milk
red food coloring
1/3 - 1/2 cup semi-hard red and white peppermint candies
1 pint vanilla ice cream
Scald milk in double boiler; add mints and stir frequently until dissolved. (As mints vary in sweetness, a few more or less may be needed). Add the desired amount of food coloring. Chill. Beat with ice cream until

well blended. Pour into tall glasses. Garnish each glass with one or two extra mints floating on top, or serve with a peppermint stick. Serves 4.

ORANGE FLOAT
Fill tall glasses two thirds full of ice cold chocolate drink. Add a generous scoop of orange sherbet. Or for a Frosted Float, pour one quart ice cold chocolate drink into bowl, add 1 pint of orange sherbet, beat with egg-beater or electric mixer until blended. Fill glasses and serve at once. Serves 5.

3 WAYS TO MAKE GOOD ICED COFFEE
1. Quick Method: Make extra-strength coffee by using 1 measuring cup (4 fluid oz.) of water cream for each standard measure (2 level tbsp.) of coffee - pour hot over ice cubes.

2. Pre-Cooled: Make Coffee: 1 standard measure (2 level tbsp.) to each 8 oz. cup of water. Cool in covered non-metal container. For freshest taste, serve within 3 hours. Pour over ice cubes.
3. Instant: Mix twice the usual amount of instant coffee with a little water, add ice cubes, fill glass with water.
HINT - In refrigerator trays, freeze regular strength coffee into cubes - your fresh coffee over them. Delicious - and no dilution.

THE LOCAL NEWSPAPER MAINTAINS ITS INFLUENCE

- How often a successful executive, far from his small-town birthplace — maintains his contacts through regular receipt of his weekly newspaper.
- There is nothing quite like a small town weekly for neighborly news and intimate contacts.
- People in the advertising business talk about selected audiences — sharply focused circulation. They have learned from experience that when a publication is specially edited to appeal to the specific interests of a smaller group of people, its opportunities to make sales are multiplied many times over.
- The weekly newspaper is that kind of publication. Whether its circulation is a few hundred or a few thousand, it represents effective circulation.
- Gather the towns-people and farm folk around you when you advertise. Surround yourself with friendly neighbors — deliver your advertising message through your local weekly newspaper.

58.2 Per Cent of Canada's population live in places of 10,000 or less. **THESE ARE WEEKLY NEWSPAPER MARKETS.**

What Other Papers Say . . .

ANOTHER VERSION OF CONVERSION . . .

The government's invitation to change old Victory bonds for new ones of the Canadian conversion loan was a necessary step in the orderly financing of this country's national indebtedness. Five of the old war-time Victory loan issues will mature within a period of the next few years, and government officials favored the sensible plan of refunding all five at the same time by means of this single new issue of conversion bonds.

These new conversion bonds will yield a higher rate of interest as an inducement to Victory-bond holders to convert their present bonds rather than cash them in. No one, of course, is compelled to accept the government's offer. It is a matter for each person owning a V-bond to decide for himself. But since the rate of interest is higher on these conversion bonds, and because other basic attractions of government bonds remain unchanged, it seems likely that most people will accept. Within three days of the announcement of the new bonds, over one billion dollars of the old bonds had been converted.

Financial experts claim that besides refunding the old debt, the new conversion loan will also stabilize many factors affecting the borrowing of funds, and clear up uncertainties which have lately added to the difficulties of bond financing. This should make it easier for municipalities and other borrowers to obtain the new money they must have in order to pay for the growth of essential services.

Whether this is a true picture of Canada's money market or not, the success of the present conversion loan is vital to the financial stability of this country, since it refines indebtedness on an orderly basis, spread over a 25-year period.

— The Lacombe Globe

About sales tax for this province, the CLARESHOLM LOCAL PRESS says: "Alberta each year contributes much into the coffers of sales tax states and there is no reason why Alberta, too, couldn't take advantage of the heavy influx of tourists to collect something for roads."

Noting the drought in Saskatchewan and Manitoba, THE BRCCO BULLETIN says: "The smaller crop this year will cut into the huge surplus that has been piled up. The increased export and heavy feeding of wheat to livestock has already made big inroads into the stored up supplies. The carry-over at the end of this month will be down substantially from last year's figures. There should be a lot more elevator space for grain deliveries when harvest time comes along."

MORE ZOOM IN CANADIAN GAS . . .

Canadian oil refineries are now turning out regular grade gasoline with the highest octane levels available anywhere.

During the last two months the octane level has drawn abreast of, and then surpassed slightly, that of corresponding gasoline grades in the United States.

Octane levels is a measure of a gasoline's ability to resist knocking.

THE MYSTERY SOLVED . . .

A frightened householder excitedly reported to police headquarters that he had been struck down in the dark outside his back door by an unknown assailant.

A young policeman was sent to the scene of the crime to investigate and soon returned with a lump on his head and a glum look on his face.

"I solved the case," he muttered. "Amazingly fast work," his superior complimented him. "How did you accomplish it?"

The young cop explained: "I stepped on the same rake!"

Life-saving is every body's business. Learn how to throw a buoy . . . give a reaching assist . . . and apply artificial respiration. In instruction in life-saving technique is one of the services provided by the Water Safety Service of your Red Cross. If you are a good swimmer, enroll in a Red Cross instructor's course. Your knowledge may save a life.

NO HOFFA DOMINATION WANTED HERE . . .

The muscular Teamsters' Union will soon be told it cannot control the Canadian section of the St. Lawrence Seaway. Clive Baxter reports from Montreal in The Financial Post.

A special meeting has been called by the Canadian Labor Congress in Ottawa for the end of August. At it will be Canadian unions that refused to attend a teamster union meeting in Montreal recently.

Almost certainly Teamsters and its chosen partners, the National Maritime Union International Longshoremen's Association, will be told that Canada has no intention of letting Teamster President Hoffa's dream of one vast Teamster-dominated transportation union take root here. And equally certain Teamsters is not going to like what it hears.

MONOPOLY ???

From time to time during the hearings of the Bracken Commission which has been checking the boxes, allocation question, charges have been made that acceptance of one or other of the plans suggested by the Prairie Wheat Pools would result in a "monopoly" . . .

To suggest that a monopoly would result from a system which would allow the farmer his choice of elevators appears to imply a fear on the part of the critics that literally all farmers would elect to deliver to Pool facilities . . .

To our way of thinking, the monopoly charge is a poor defence of the present system. It betrays, on the part of those making it, a complete lack of faith in their ability to attract business under conditions which would enable farmers to deliver grain exactly where they wished to deliver it.

— Western Producer

DROWNINGS USUALLY NOT ACCIDENTAL

Drownings, aren't mere accidents. They usually happen because people don't know or practise the rules of water safety. Don't be a drowning statistic — learn and obey the rules of safety when in or on the water.

JASPER NATIONAL PARK

Come — with camera, sketch book, palette, or your mind's eye open to all things lovely, for here in the rugged grandeur of Jasper National Park every turn of the road is an artist's viewpoint. Lakes are mountain-set gems of jade and crystal; forests a sanctuary for wild birds and animals; and alpine meadows a garden of bright and fragrant flowers. And — there's as much to DO as there is to SEE at Jasper — boating, fishing, swimming, camping, hiking, riding, climbing and golfing.
